## **GROSVENOR RANGE.**

### **Poultry house with run attached.**

The house section is raised to allow poultry access to the area below.

The underside of the house gives a weather protected feed point. This is achieved by the provision of a fixed rear panel and one removable side panel. A second side panel is available as an option. This feed point is best utilised by fitting an 'Eltex' Elite feed hopper to the swivel rear panel that is a feature of this range.

Construction is of pre-treated softwood framing and tongue and groove cladding with 'Onduline' sheeted roof.

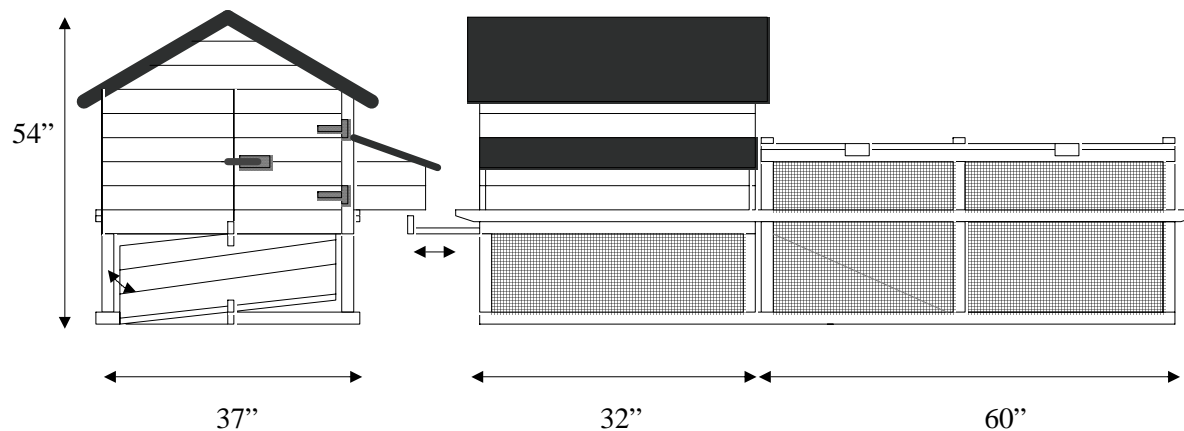

External nesting box, slide out floor and roosting bars are supplied as standard.

Pop hole access to the run is provided with a drop down cover and ramp to run area. The run is constructed with 25mm. square 16 gauge heavy mesh and has a removable top for access.

## **GROSVENOR JUNIOR.**

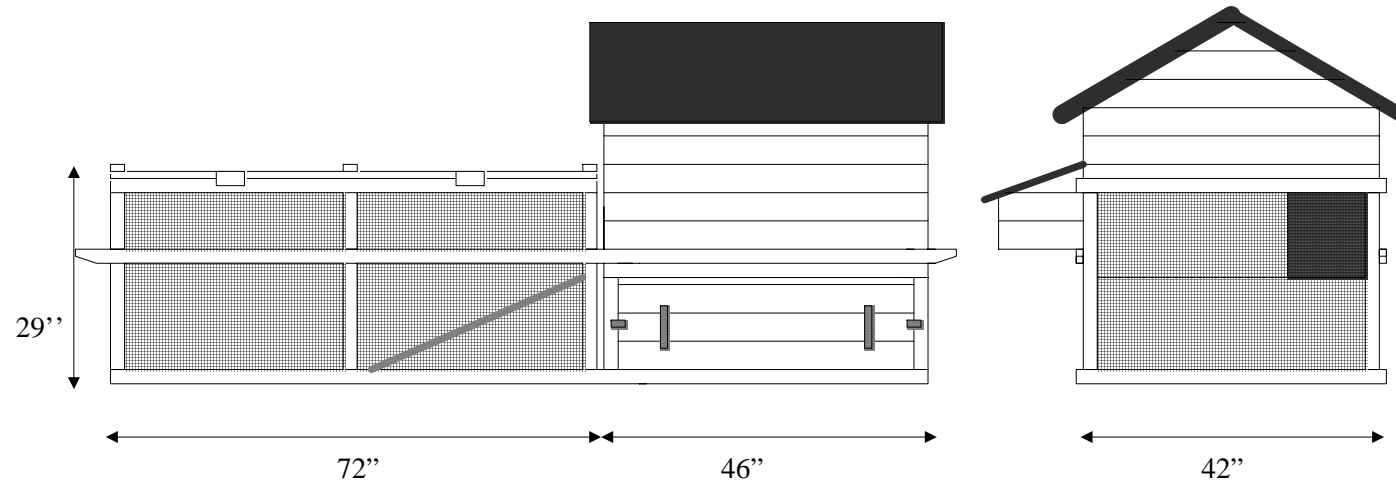

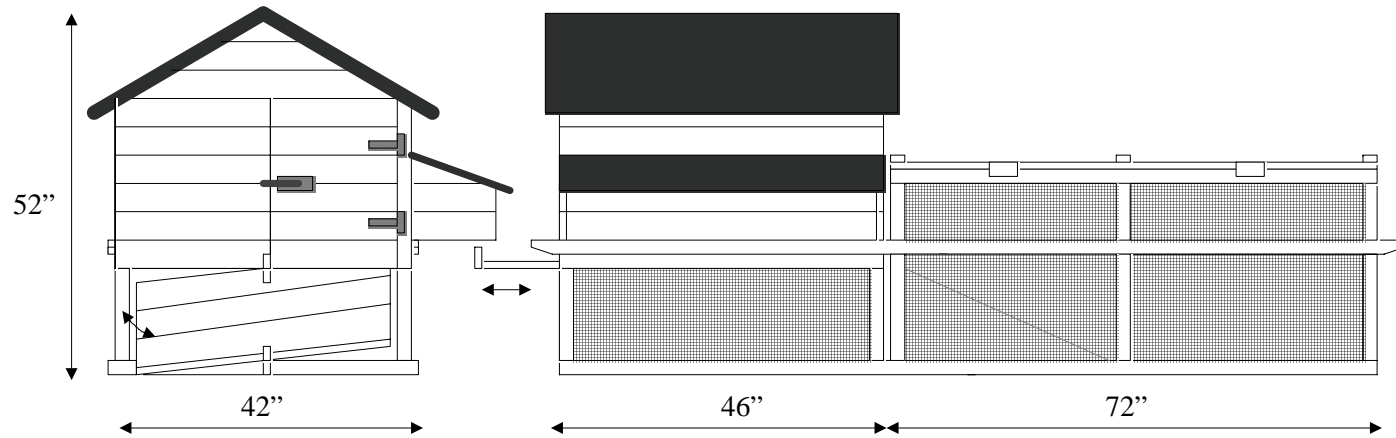

### **Suitable for up to 6 birds.**

A smaller unit more easily carried by two people. Has all the features of the standard Grosvenor.

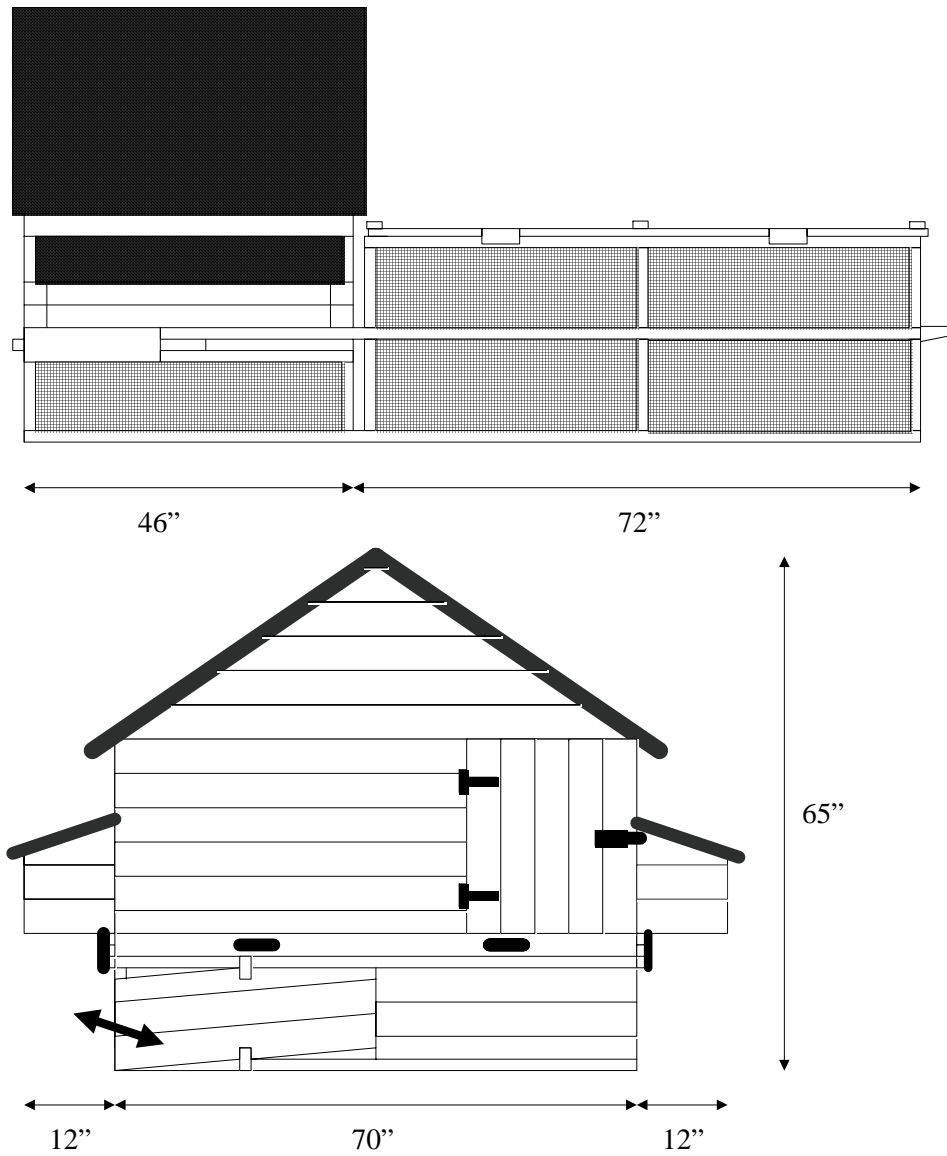

**UGROSVENOR STANDARD.**

Suitable for up to 12 birds.

## GROSVENOR MAJOR

**Suitable for up to 20 birds** The largest model of this range but still moveable using the carry handles fitted to each corner. (Note: this unit can be lifted by four people)  
Retains all the features of the standard unit. Two external nest boxes are fitted.

**Wheels Can be Fitted to All Units**
